# Structure

Graboplast Ltd. reserves the right to make changes in design, construction, or specifications of the products it manufactures at any time without incurring any obligation in incorporating such changes in products previously sold.

## Advantages

Unique design owing to our manual TLSS selection system.

Natural oiled surface for enhancing the beauty of real wood.

Rangifer®

Durable, water-resistant surface - the solid wood surface is treated with Rangifer® UV varnish in seven layers.

Quick and easy installation with Välinge licence-based LOC (2G) and Click&Go! (5G) locking systems.

Environmental friendly, formaldehyde - free product - ISO 14001.

Prime product - Grabo parquets are produced with German technology providing 30 years of warranty.

## Real wood flooring in your home

In the parquet plant of Graboplast, which has decades of experience, the most traditional building material is used to the highest standards with state-of-the-art technology in order to create a wood flooring of absolute perfection.

Whether it is about traditional or mainstream, up-to-date design, quality raw materials and the structure of Grabo parquets guarantee long term satisfaction.

## Harmonising with nature

While manufacturing Grabo parquets and thriving to achieve perfection, we always bear in mind that the raw material we use is the gift of nature. It is essential for us that wood used to manufacture our quality products should be from an authorised source which guarantees added value in harmony with nature and sustainable development.

Assurance and continuous supervision of this is our common interest. This dedication made us decide to manufacture Grabo parquets to meet the principles of the internationally recognised PEFC Certificate while keeping sustainable forest management in mind.

## World standard in the heart of Europe

Manufacturing our CE marked products is done within the framework of rigorous quality and environmental management systems in order to continuously maintain guaranteed quality. At Graboplast, one of the largest parquet manufacturers of Europe, the reliability of these systems is certified by ISO9001 and ISO14001 standards.

## Certified quality

Hundreds of thousands of satisfied customers provide a convincing proof of the quality of our products and inspections carried out by independent institutions certify to our international markets that Grabo parquets do stand the test worldwide.

Our products are certified to meet the rigorous criteria of the Finnish M1 (Emission Classification of Building Materials) quality label.

## Among the leaders

Graboplast Ltd has a long history of being a permanent member of FEP (European Federation of the Parquet Industry) one of the most prominent professional organisations of the European parquet industry. Up-to-date information resulting from this membership also helps our customers to realise their dreams of even the highest standards using Grabo parquets.

## Grabo Parquet has never been so easy to install! Click&Go! Locking System\* by Graboplast

- Strong and robust joint system - ensured by an optimised profile and a glass fibre reinforced tongue on the short side of the board.
- Significantly improved efficiency leads to time and cost saving - achieved when installing flooring equipped with Click&Go! Locking system in comparison with other joint systems.
- The special design of the locking profile combined with the high performance glass fibre reinforced tongue offers superior function during climate changes and forces applied to the floor.

When a board is folded down, a flexible tongue is pushed into a groove. When it reaches its final position, the locking emits a "click" sound and locks the product both vertically and horizontally.

# *Tradition and elegance*

Our most popular product range, which tastefully decorates hundreds of thousands of homes worldwide with its assortment of woods and colours.

Natural wood will always remain an ever-relevant, renewable and repairable material. For top quality parquet floorings the secret of long life is the combination of extreme strength granted by their basic components and the impeccable structural design.

Due to its versatile applicability, GRABO GIANT can be installed on virtually any site, irrespective of the method of its construction, and is likely to become the highlight of any residential or sports interior. The 22 mm thickness and a reinforced joint system account for the superb mechanical properties of GRABO GIANT.

- A** Hardwood top layer
- B** Solid pine middle layer
- C** Bottom: 3 layer plywood

**Properties:**

Hardwood top layer: Oak / Ash  
 Overall thickness: 22 mm  
 Thickness of the top layer cca.: 3.6/5.2 mm  
 Board size: 2250 x 190 mm  
 Joint system : TG\*

# The Power of Nature

Using a construction technology of any kind, this extremely powerful and widely applicable engineered parquet product range with an overall thickness of 22 mm, which is specially developed to withstand extreme loads, might well be the greatest ornament of the interior.
