ART MADE OF MARBLE. THIS GREY MARBLE IS ORIGINALLY FROM BRAZIL. ITS REMARKABLE AND HARD-LADEN VEINS GIVE IT ITS HEART WRENCHING AND POWERFUL APPEARANCE. A CANVAS OF HUGE BRUSHSTROKES IN ORANGE AND GREY TONES ARRANGED WITH SUBLIME ELEGANCE. INVISIBLE GREY OWNS A GREAT PRESENCE IN THE MOST ELEGANT AND MODERN SPACES.

EL ARTE HECHO MÁRMOL. ESTE MÁRMOL GRIS ES ORIGINAL DE BRASIL. SUS VETAS LLAMATIVAS Y CARGADAS DE DUREZA LE DAN SU ASPECTO DESGARRADOR Y POTENTE. UN LIENZO DE PINCELADAS ENORMES EN TONOS NARANJAS Y GRISES DISPUESTAS CON UNA ELEGANCIA SUBLIME. INVISIBLE GREY NO PASA DESAPERCIBIDO EN LAS ESTANCIAS MÁS ELEGANTES Y MODERNAS.

DARK BRUSHSTROKES ON A HOMOGENEOUS BACKGROUND. THE MAGNIFICENT DOLOMITE VEINING DRAWS A STONY MAP ON A FLAWLESS CANVAS.
ITS DAZZLING BEAUTY IS HIGHLY VALUED, TOGETHER WITH A TRADITIONAL AND MODERN AESTHETIC WHICH BRINGS BACK, AT THE SAME TIME, A RELAXING SENSATION OF GREAT BALANCE. THIS STONE IS ORIGINALLY FROM BRAZIL.

PINCELADAS OSCURAS SOBRE FONDO HOMOGÉNEO. EL MAGNÍFICO VETEADO DE DOLOMITE DIBUJA UN MAPA PEDREGOSO EN UN LIENZO IMPECABLE.
SU DESLUMBRANTE BELLEZA ES MUY APRECIADA. UNA ESTÉTICA TRADICIONAL Y MODERNA QUE A LA VEZ DEVUELVE UNA SENSACIÓN RELAJANTE DE GRAN EQUILIBRIO. PIEDRA ORIGINARIA DE BRASIL.

SANICERAMIC GROUP

GENERAL CATALOGUE

PHILOSOPHY

The creation of ITT, is the result of a project based on our long experience in the ceramic industry, being an established company in the market, with years of experience behind us yet, a company that believes in a work well done and with broad future horizons.

Our philosophy is based on the values of quality work, innovation, expertise and service.

Our main objective is to maintain a preferential and direct contact with all our clients, offering personal attention and dedication that seeks maximum satisfaction, which is the engine of our goals that are reached through perseverance, enthusiasm and involvement.

The innovation, just as much in the field of technology and design as in the process of management and organization, is a clear bet of our company and an investment of the future.

The experience of ITT Ceramic group, with more than 35 years of working in the ceramic sector, is an added value and security asset when it comes to trusting our company.

All of this has taken ITT Ceramic group to be, right know, one of the leading companies of this sector in volume of sales, quality of the product, at the forefront of design and international presence.

ITT CERAMIC®

INNOVATING TRENDING TILES

SANICERAMIC GROUP

100% Made in Spain
100% Hecho en España

FILOSOFÍA

La creación de ITT, es el resultado de un proyecto basado en nuestra larga experiencia en el sector cerámico, siendo una empresa consolidada en el mercado, con años de experiencia que nos avalan y a la vez, una empresa que cree en el trabajo bien hecho y con un amplio futuro en sus horizontes. Nuestra filosofía de trabajo se basa en los valores de calidad, trabajo, innovación, experiencia y servicio.

Nuestro principal objetivo es mantener un contacto directo y preferente con todos nuestros clientes, ofreciéndoles un trato personal y una dedicación que busca la máxima satisfacción, siendo el trabajo el motor de nuestras metas, el cultivo de una labor dirigida a un claro resultado al que solo se llega a través de la perseverancia, entusiasmo e implicación.

La innovación, tanto en la tecnología y el diseño como en el proceso de administración y organización, es la apuesta de nuestra compañía y una inversión de futuro.

La experiencia del grupo ITT Ceramic, con más de 35 años trabajando en el sector de la cerámica, es un valor añadido cuando se trata de confiar en nuestra compañía.

Todo esto ha llevado al grupo ITT Ceramic, hasta ahora, a ser uno de los principales de este sector en volumen de ventas, calidad del producto y a la vanguardia en diseño y con presencia internacional.

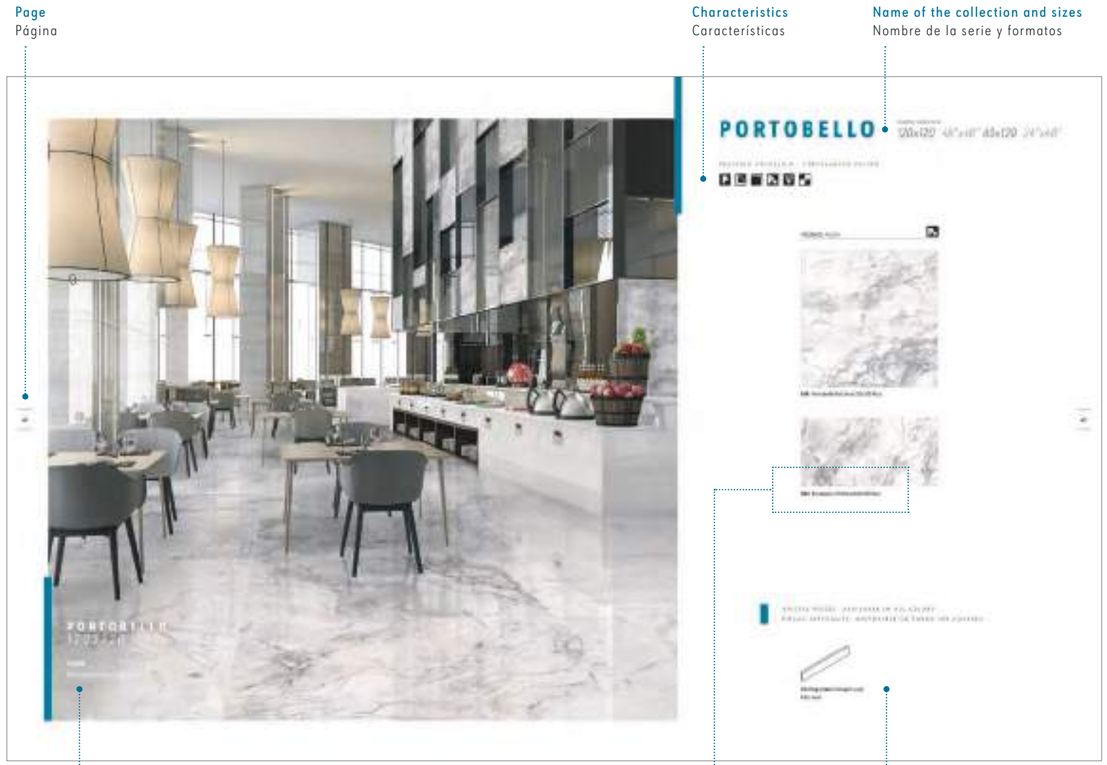
PAGE EXAMPLE | EJEMPLO DE PÁGINA



Due to the printing process of the catalogue the representation of the colors of pieces is approximate and may differ slightly in shade from the real pieces.
References, price groups and packing details should be checked, as there may be typographical errors when printing this catalogue.

Debido al proceso de impresión del catálogo la representación de los colores de los productos es aproximada y puede variar ligeramente en tono respecto a las piezas reales.
Referencias, grupos de precio y características de packing deben verificarse, ya que puede haber errores tipográficos a la hora de imprimir este catálogo.

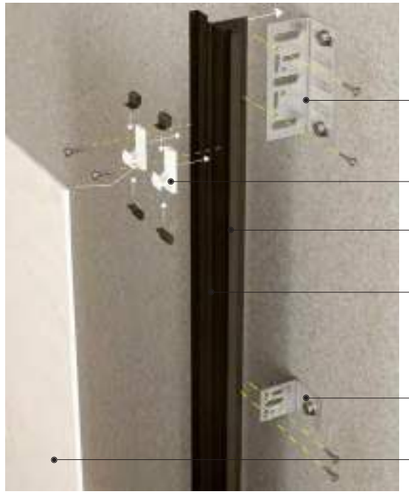
- **Resistance to wear and tear.** *Resistente al desgaste y al rayado.*
- **Frost Resistant.** *Resistente al hielo.*
- **Immune to time.** *Inalterable en el tiempo.*
- **Resistant to chemicals.** *Resistente a los químicos.*
- **Environmental-friendly.** *Respetuoso con el medio ambiente.*
- **UV Resistance.** *Resistencia a los rayos UV.*
- **Bending resistance.** *Resiste a la flexión.*

ARKTECH GL SYSTEM

Is a system for fixing lightweight panels (Arklam Slim 6mm) on ventilated facades. For the installation of this system few elements are needed which makes it a very simple system to install and due to the great variety of light panels on the market it is easy to give the building a unique architectural design, safe and really effective. These panels will be fixed to the vertical "T" or "L" profiles with a gluing system specially designed by Sika, consisting of double-sided tape and approved structural adhesive.

Es un sistema para la fijación de paneles ligeros (Arklam Slim 6mm) en fachada ventilada. Para la instalación de este sistema se necesitan pocos elementos lo cual hace que sea un sistema muy sencillo de instalar y debido a la gran variedad de paneles ligeros en el mercado es fácil conseguir darle al edificio un diseño arquitectónico singular, seguro y realmente efectivo. Estos paneles serán fijados a los perfiles verticales en "T" o "L" con sistema de pegado especialmente diseñado por la firma Sika compuesto de cinta doble cara y adhesivo estructural homologado.



ARKTECH VST SYSTEM

The system is composed of support and retention brackets, vertical profiles and staples on which the cladding rests, all in high quality Aluminium T5 6063. By means of the supporting and retention brackets or separators, a correct planimetry of the vertical profiles is achieved, thus correcting any possible deviations from the original face of the façade to be covered.

The staples used to support the weight of the ceramic panels are made of aluminium and lacquered from the RAL of the porcelain tile, incorporating an EPDM bushing to absorb any expansion of the structure. Once fitted, the clamp can be slid vertically along the profile, thus facilitating its installation. Finally, the clips are screwed to the vertical profile by means of self-drilling stainless steel screws.

In order to favour the dimensional stability of the system, an elastic adhesive cord is applied along the vertical profile, which ensures the correct positioning of the chosen panels, improving the system's responses to pressure, wind suction and gravitational loads, thus absorbing the derived vibrations and thus avoiding possible movements.

El sistema está compuesto por ménsulas de sustentación y retención, perfiles verticales y grapas sobre las que se apoya el aplacado, todo en Aluminio T5 6063 de alta calidad. Por medio de las ménsulas o separadores de sustentación y retención se consigue una correcta planimetría de los perfiles verticales, corrigiendo así las posibles desviaciones del paramento original de la fachada a recubrir.

Las grapas encargadas de soportar el peso de los paneles cerámicos están fabricadas en aluminio y lacadas del RAL de la placa porcelanica, incorporan un casquillo de EPDM para absorber las posibles dilataciones de la estructura. Una vez encajada la grapa se puede deslizar en dirección vertical a lo largo del perfil facilitando así su instalación. Finalmente las grapas son atornilladas al perfil vertical por medio de tornillería autotaladrante de acero inoxidable.

Para favorecer la estabilidad dimensional del sistema se aplica un cordón del adhesivo elástico a lo largo del perfil vertical, que asegura el correcto posicionamiento de los paneles escogidos mejorando las respuestas del sistema a las cargas de presión, succión de viento y gravitatorias, absorbiendo así las vibraciones derivadas y evitando con ello los posibles movimientos.

ARKTECH FULL SYSTEM

This system consists of support and retention brackets, staples, T-shaped vertical profiles and horizontal profiles. Thanks to the brackets it is possible to achieve the correct levelling of the vertical profiles, and in this way, we can be sure that possible deviations from the original surface of the façade to be covered are being corrected.

The horizontal hanging profile is connected to the vertical profiles by means of self-drilling screws with hexagonal heads made of A2 stainless steel. The staples of internal fixation in Aluminium, are anchored on the longitudinal discontinuous grooves in the shape of dovetail (at 45°), located in the back part of the porcelain tile, allowing a 100% mechanical fixation.

A continuous horizontal profile of pressure closing joins the system of fixing clamps, by means of A2 self-drilling screws, thus forming a body between the fixing clamp and the continuous horizontal profile, for subsequent assembly on horizontal hanging profile located in the substructure, with the possibility of being able to regulate the plate, thanks to its regulation mechanism, making the installation of the system possible in a simple, efficient and above all safe manner.

The system is designed to be installed only with mechanical fixing, however its geometry allows the application of a structural adhesive, offering a safety bonus through a combined fixing system (mechanical-chemical).

The assembly has a system of SELF-COMPENSATION by means of stainless steel compression springs, which allow to assimilate the deformations by expansion of the substructure, in addition these springs contribute to support the own weight of the plate.

Este sistema se compone de ménsulas de soporte y retención, grapas, perfiles verticales en forma de "T" y perfiles horizontales. Gracias a las escuadras es posible conseguir la correcta nivelación de los perfiles verticales, y de esta forma, podemos estar seguros de que se están corrigiendo las posibles desviaciones de la superficie original de la fachada que se ha de cubrir.

El perfil horizontal de cuelgue está unido a la perfilería vertical por medios de tornillería autotaladrante de cabeza hexagonal fabricados en acero inoxidable A2. Las grapas de fijación interna en Aluminio, se anclan sobre las ranuras discontinuas longitudinales en forma de cola de milano (a 45°), ubicadas en la parte posterior del azulejo porcelanico, permitiendo una fijación 100% mecánica.

Un perfil horizontal continuo de cierre a presión, une el sistema de grapas de fijación, mediante unos tornillos auto perforantes A2 formando así un cuerpo entre la grapa de fijación y el perfil horizontal continuo, para su posterior montaje sobre perfil horizontal de cuelgue ubicado en la subestructura, con la posibilidad de poder regular la placa, gracias a su mecanismo de regulación, haciendo que la instalación del sistema se pueda realizar de una manera sencilla eficaz y ante todo segura.

El sistema está concebido para ser instalado únicamente con fijación mecánica, no obstante su geometría permite la aplicación de un adhesivo estructural, ofreciendo un plus de seguridad mediante un sistema de fijación combinado (mecanico-quimico).-

El conjunto posee un sistema de AUTOCOMPENSACION mediante resortes de compresión de acero inoxidable, los cuales permiten asimilar las deformaciones por dilatación de la subestructura, además dichos resortes contribuye a soportar el peso propio de la placa.

TECHNICAL INFORMATION

INFORMACIÓN TÉCNICA

CERTIFICATIONS | CERTIFICADOS

CE Marking declares conformity of our products with the technical and legal requirements for safety.

Marcado CE que declara la conformidad de todos nuestros productos con los requisitos legales y técnicos en materia de seguridad.

CCC Certificate that guarantees that our products meet the standard of radioactivity.

Certificado CCC que avala que nuestros productos cumplen con el estándar de radioactividad.

Certificate of content in COVs (Volatile substances) which states that our products are exempt and belong to type A +.

Certificado del contenido en COV's (Sustancias volátiles) que declara que nuestros productos están exentos y son de tipo A+.

The LEED (Leadership in Energy & Environmental Design) Certification is a globally recognized symbol granted to buildings and projects with high standards of eco-efficiency and sustainability achievement.

La certificación LEED, Líder en Eficiencia Energética y Diseño sostenible, supone que el edificio o proyecto al que se refiere está construido con los estándares de ecoeficiencia y cumple con los requisitos de sostenibilidad.

AENOR certification, for implementing and maintaining a Quality Management System for the following scope: design, development, manufacture and marketing os ceramic tiles that meet fulfills the requirements of the following standard ISO 9001:2015 Registrer Number: ER-0498/2020./

Certificación de AENOR, para la aplicación y mantenimiento de un Sistema de Gestión de Calidad para el siguiente ámbito: diseñar, desarrollar, fabricar y comercializar baldosas cerámicas que cumplan los requisitos de
Norma ISO 9001:2015 Número de registro: ER-0498/2020.

Conjunto de normas, normas experimentales e informes estándares creados en los Comités Técnicos de Normalización de la Asociación Española de Normalización y Certificación.

Set of standards, experimental norms and standard reports created in the Technical Committees for Standardization of the Spanish Association for Standardization and Certification.

The BATTENT - CSTB Science and Technology Centre launched QB - Quality in Building to simplify the current certification scene in the construction sector, to maximize the readability of benchmarks for the quality, performance and reliability of products, services and stakeholders. This new certification mark will gradually replace the CSTBat, CSTBat Service, Certifié CSTB Certified and UPEC CSTB marks.

El Centro Científico y Tecnológico del BATTENT - CSTB lanzó QB - Quality in Building para simplificar la escena de certificación actual en el sector de la construcción, maximizar la legibilidad de los puntos de referencia para la calidad, el rendimiento y la confiabilidad de los productos, servicios y partes interesadas. Esta nueva marca de certificación reemplazará gradualmente las marcas CSTBat, CSTBat Service, Certifié CSTB Certified y UPEC CSTB.

The DAPcons® Certification is an EPD ecolabeling program of the pioneer construction in Spain following the European directives and regulated by the ISO 14025 and 15804 standards.

La Certificación DAPcons® es un programa de ecoetiquetado de EPD de la construcción pionero en España siguiendo las directrices europeas y regulado por las normas ISO 14025 y 15804.

The Technical Suitability Document is a voluntary document issued by the Eduardo Torroja Institute of Construction Sciences, which contains a favourable technical assessment of the suitability of nontraditional or innovative construction materials, systems or procedures for use in building and/or civil engineering.

El Documento de Idoneidad Técnica es un documento de carácter voluntario expedido por el Instituto de Ciencias de la Construcción Eduardo Torroja, que contiene una apreciación técnica favorable de la idoneidad de empleo en edificación y/u obra civil de materiales, sistemas o procedimientos constructivos no tradicionales o innovadores.

**The Integrated Environmental Authorisation (IEA) is an administrative intervention figure that, for the affected installations, replaces the set of environmental authorisations existing until the entry into force of Law 16/2002, of 1 July, on integrated pollution prevention and control, and which establishes an environmental condition for the operation of the activities and installations contemplated in
Annex I of said Law.**

La Autorización Ambiental Integrada (AAI) es una figura de intervención administrativa que, para las instalaciones afectadas, sustituye al conjunto de autorizaciones ambientales existentes hasta la entrada en vigor de la Ley 16/2002, de 1 de julio, de prevención y control integrados de la contaminación, y que establece un condicionado ambiental para la explotación de las actividades e instalaciones contempladas en el Anexo I de dicha Ley.

A permit, issued by SASO, to use the Quality Mark on products, which verifies that the facility has an effective management system that ensures production conformity with the General Technical Regulation, granting procedure and Saudi standard specification.

Permiso, expedido por SASO, para utilizar la marca de calidad en los productos, que verifica que la instalación dispone de un sistema de gestión eficaz que garantiza la conformidad de la producción con el Reglamento Técnico General, el procedimiento de concesión y la especificación de la norma saudí.

LAYING & MAINTENANCE
COLOCACIÓN & MANTENIMIENTO

Correct, careful laying of ITT Ceramic's products is vital for taking full advantage of their technical characteristics. (Standard of reference: UNE 138002) For this reason, the following points are necessary:

1. Check the calibre, tone and quality of the product before laying.
2. Choose appropriate installation tools (toothed trowel, white rubberhammer, suction grip and rubber trowel for pointing).
3. Ensure that the surface on which the material is to be laid is level, clean and insulated from damp.
4. Pay special attention to the type of adhesive to be used (consult the habitual adhesive supplier), since each type of ceramic requires the appropriate adhesive. (Standard of reference: EN-1348).
5. The professional responsible for laying the material must choose the appropriate joints between pieces and the perimeter joints, in order to guarantee correct absorption of structural movements, and an allowance for dimensional tolerances of the product. ITT Ceramic recommends laying the tiles with a minimum joint between 1,5 mm to 3 mm thickness, depending on thickness and format (Always consult the standard UNE 138002) and checking for other indications given on the box (measurements between calibres, recommended joint).
6. Do not use coloured pointing material containing black smoke (micronised carbon) or dyes which can hamper the cleaning of the tiled surface.
7. Clean off excess pointing material from the surface of the tiles when it is still fresh, using a sponge and clean water; never use hard materials that could scratch the tiles, such as metal spatulas or abrasive scourers. Always follow the recommendations given by the adhesive manufacturer.
8. Once the tiles are laid, avoid working in the tiled zone (plastering, painting, placing scaffolds/ladders, projecting metallic fragments from disc grinders, moving tools, dragging heavy objects, moving remains of abrasive building materials, etc.) If this cannot be avoided, always protect the tiles and joints to prevent problems of cleaning or deterioration.The materials used for this protection must not be harmful or contain chemical products which may damage the tilling.

Special for laying steps:
The substrate must be perfectly clean and smooth.
Begin laying from the top downwards.
A good preliminary rethinking by the Facultative Direction is recommended.
Do not leave any zones without cement glue.
Fill completely the gap between the wall and the lower edge of the step. Always place the riser at the same level as the step.
It is recommended to protect the step surfaces while working. Avoid direct blows to the steps both during and after installation.

Special for laying rectangular formats:
When laying rectangular formats discontinuously, never do so in the centre of the piece.
In order to maintain the aesthetic appearance and avoid difficulties in installation, we recommend that discontinuous laying does not exceed 25% of the side to which it is applied.

During fixing:
Once the tiles have been fixed, it will be necessary to provide adequate protection against possible damage during subsequent building work, covering them with cardboard, thick, carpet or plastic.

Cleaning after fixing:
Residues remaining after work completion can be easily removed with a commercial detergent or an acid-based one, always considering the chemical resistance indicated by the manufacturer. When using cleaning products the following general considerations should be taken into account:

- Acid cleaning should never be carried out on recently laid floor tiles. The reaction of the acid with the unset cement may damage the joints or deposit insoluble compounds on the surface.
- It is recommended to soak the surface with clean water before using any chemical agent. This prevents the grouts from absorbing these agents. Clean the surface with water immediately after the treatment to remove any remain of the chemical products.
- Trowels and abrasive scourers must not be used. The use of sponges is strongly recommended, especially natural ones.
- The fixing by a professional tiler is highly recommended for getting the best performance.

Routine care:
Daily cleaning of stoneware tiles is particularly simple, it only requires clean water to which an alkaline base cleaner may be added.
The use of waxes, oils or similar products is not recommended since the non-porous glazed surface prevents from a correct application.
It may occasionally occur that stains cannot be fully removed with a commercial detergent, making necessary to use solvents or specific cleaning agents. It is recommended to firstly check the chemical resistance of the tile and, as an extra precaution, test in a clean, spare tile or in non-visible area.

Important:
Hand-painted ceramic wall tiles or complementary pieces on third and fourth firing must be treated with extreme care during both the fixing and subsequent cleaning, as well as during ordinary routine cleaning. The use of pure or diluted acids, detergents or other corrosive products will seriously harm their original look.

Una colocación adecuada y cuidadosa de los productos fabricados por ITT Ceramic es vital para hacer resaltar al máximo las características técnicas de los mismos. (Norma de referencia UNE 138002). Por este motivo, es necesario:

1. Verificar el calibre, tono y calidad del producto, antes de la colocación.
2. Escoger herramientas de instalación adecuadas (llana dentada, maza de goma blanda, ventosa y llana de goma para la aplicación de la junta).
3. Que la superficie sobre la cual vaya a instalarse el material esté nivelada, limpia y aislada de la humedad.
4. Prestar especial atención al tipo de adhesivo a utilizar (consultar con el proveedor habitual de adhesivos), dado que cada tipo de cerámica requiere el adhesivo adecuado. (Norma de referencia: EN-1348 y UNE 138002).
5. El profesional responsable de la colocación del material, debe elegir adecuadamente las juntas entre piezas, así como las juntas perimetrales, de manera que se garantice una correcta absorción de movimientos estructurales, y una compensación de tolerancias dimensionales del producto. ITT Ceramic recomienda colocar la cerámica con una junta mínima de entre 1,5 mm y 3 mm dependiendo de espesor y formato (consultar siempre la norma UNE 138002) y comprobar si en la caja hay otras indicaciones (medidas entre calibres o junta recomendada).
6. No se debe utilizar junta de color que contenga negro de humo (carbón micronizado), ni tintes que pueden dificultar la limpieza de la superficie revestida.
7. Limpiar los restos de rejuntado de la superficie de las baldosas cuando aún están frescos, utilizando una esponja con agua limpia; en ningún caso deben utilizarse materiales que presenten alta dureza y puedan rayar el producto cerámico tales como espátulas metálicas o estropajos abrasivos. Siempre se deben seguir las recomendaciones indicadas por el fabricante de adhesivos.
8. Una vez colocado el azulejo, hay que evitar las operaciones en la zona alicatada (enyesado, pintura, colocación andamios/escaleras, proyección de restos metálicos de radiales, trasiego de herramientas, arrastre de objetos pesados, resto de materiales abrasivos de obra, etc.), en caso contrario, siempre hay que proteger las baldosas y las juntas para evitar posteriores problemas de limpieza o deterioro. El material que se use para esta protección no debe dañar ni contener productos químicos que dañen al azulejo.

Especial colocación de peldaños:
El soporte estructural debe estar totalmente limpio y enrasado en superficie.
Se recomienda un buen replanteo previo por parte de la Dirección Facultativa.
Empezar la colocación desde arriba hacia abajo.
Es imprescindible no dejar zonas sin cemento cola.
Macizar completamente el hueco entre la pared y el borde interior del peldaño.
Colocar siempre la tabica (contra-huella) al mismo nivel que el peldaño.
Se recomienda la protección del peldaño durante la obra.
Se deben evitar golpes directos a los peldaños durante la obra y una vez instalados.

Especial colocación de formatos rectangulares:
La colocación a rompejunta de formatos rectangulares nunca debe realizarse en la mitad de la pieza.
Se aconseja que para mantener la estetica y evitar dificultades en su instalación, la colocación a rompejunta no supere el 25% del lado sobre el que se aplica.

Durante los trabajos de ejecución:
Dado que el pavimento no es el último elemento a colocar en una obra, será necesario una vez instalado darle una adecuada protección frente a posibles daños que pudieran ocasionar trabajos posteriores, para lo cual deberá cubrirse con cartón, moqueta o plásticos gruesos.

Limpieza inicial después de haber colocado los azulejos:
Los restos de suciedad que se generan tras la puesta en obra se eliminarán fácilmente con un desincrustante comercial o, en su defecto, con un detergente de base ácida, si bien deberá tenerse en cuenta la resistencia química indicada por el fabricante de las baldosas. Para la utilización de productos de limpieza, deberán tenerse en cuenta las siguientes consideraciones generales:

- Nunca debe efectuarse una limpieza ácida sobre pavimentos recién instalados, porque el ácido reacciona con el cemento no fraguado, pudiendo deteriorar las juntas o depositar compuestos insolubles sobre su superficie.
- Es conveniente impregnar la superficie con agua limpia previamente a cualquier tratamiento químico, previniendo así la posible absorción de los agentes utilizados por el material de rejuntado, y aclarar con agua inmediatamente después del tratamiento para eliminar los restos de productos químicos.
- No deben utilizarse espátulas metálicas ni estropajos abrasivos, siendo adecuadas las esponjas, preferentemente naturales.
- Este tipo de operaciones deben ser realizadas por personal experimentado, teniendo en cuenta las características de las baldosas y las recomendaciones del fabricante.

Cuidado ordinario:
La limpieza cotidiana de las baldosas de gres es particularmente simple ya que únicamente se requiere agua limpia a la que puede añadirse un detergente de base alcalina.
No se recomienda el uso de ceras, aceites o productos similares ya que la nula porosidad de la superficie vidriada impide la correcta aplicación.
Eventualmente, podemos encontrarnos frente a manchas de tipo doméstico que no pueden ser totalmente eliminadas con un detergente comercial, por lo que será necesario el empleo de disolventes o agentes limpiadores específicos.
Deberá consultarse previamente la clase de resistencia química de la baldosa y, para mayor seguridad, es conveniente hacer una prueba de la limpieza sobre piezas de reserva o en un lugar poco visible.

Muy importante:
Los azulejos y piezas complementarias pintadas a mano y aquellas con efectos de lustres, nacarados y oros deben ser tratados con delicadeza durante los procesos de colocación y posterior limpieza, así como durante su cuidado ordinario, ya que la utilización de ácidos puros o diluidos, detergentes u otros productos corrosivos alteran de forma importante su apariencia original.
