EFFECTS

More Inspiration

Surfaces with effects offer particularly creative potential for giving a building its own individual character. Using the effect surfaces from Reynobond® and Reynolux® you can give your projects that added touch, at the same time as enjoying all the benefits of a Reynobond® aluminium composite panel or Reynolux® aluminium sheeting. With their many attractive surface designs, you will have a design palette to match the limitless potential of your own imagination.

Our innovative surfaces, such as "Wood Design" or our comprehensive range of metal versions and natural surfaces, continue to set new market standards. We can of course supply these in any colour from the RAL colour card. And what's more: To achieve a harmonised look, we can also lacquer the screws and rivets in your chosen surface colour.

More Protection

All Reynobond® and Reynolux® designs are coated with DURAGLOSS® and adapted to the relevant requirements, including special solutions for specific additional uses.

- **Anti-graffiti:** Innovative protection against the most well-known spray paints, which also facilitates easy removal of graffiti.
- **Scratch-resistant:** This 3-layer coating guarantees that the surface is particularly immune to scratches and also enhances resistance to wear and tear.
- **Easy-clean:** The enhanced hydrophilic effect of this coating offers ideal protection against environmental conditions and UV rays. As a result, the surface is much less susceptible to dirt, which can be easily removed with water and detergent.

More System

We not only provide you with the most innovative and creative range of aluminium composite panels. Our Reynolux® range also offers you stove-enameled aluminium sheeting, which is lighter than other materials but still weatherproof and dimensionally stable. The combination of Reynobond® and Reynolux® gives your projects a completely new dimension, since the two products complement each other perfectly. Manufactured at the same coil-coating plant, their colours are always certain to be identical. Hence you can clad a facade with harmonious designs but different materials, thereby gaining benefits in terms of both design and cost.

Naturally we have all the necessary assembly systems to hand for your particular facade.

Choose from four Coating Systems

You can choose between four coating systems with Reynobond® and Reynolux®:

- **DURAGLOSS®** was developed by us as a high-performance coating based on polymer resin. It offers serious resistance to wear and tear, salt, moisture, and UV rays. DURAGLOSS® comes in gloss levels of 3 % to 80 % (by comparison: only 20 % to 30 % with PVDF). Many of the colours are also available with surfaces in a powder-coated look. Your technical advisor can help you with questions on which gloss levels can be used with certain colours.
- **PVDF 70/30 coating:** This coating is considered the standard for high-performance coatings in the construction industry, mainly on account of its durability. It is ideally suited to aggressive environments and extreme climatic conditions.
- **Polyamide coating:** All the benefits of polyester plus outstanding scratch resistance.
- **Polyester coating:** This coating is very flexible and highly resistant to weather conditions. An extensive range of colours is available.

The colours shown here are just some of the many options we have to offer. We can also gladly produce individual colours upon request to match your specifications.

Due to the printing process, the colours depicted here may deviate from the actual colours available.

Reynobond® and Reynolux® can be combined in your projects without any colour deviation.

Dedicated to your Success

Our philosophy is simple: By developing outstanding, innovative products we focus on the needs and demands of our customers and thus fulfill not only their desires in terms of creativity, durability and conservation, but also open new doors onto ever-changing perspectives.

About Reynobond® Architecture and Reynolux® Building

Alcoa Architectural Products in Merxheim/France is a subsidiary of Alcoa, the worldwide leader in the manufacture of primary aluminium and aluminium products. Together with Reynobond® Architecture, the company has long been a successful global player in the composite panel market.

As part of the Alcoa Group, Reynobond® Architecture and Reynolux® Building offer you the security of a global company, but at the same time the personal service of a regional, mid-sized company – on an international scale. At present we provide customer services in almost any European language from our base in Merxheim – to us, proximity to our customers means communicating in their language.

Our Service – from Consultation to Construction

When we say service, we are talking mainly of staff commitment. This is something you'll soon learn when working with us, especially when it comes to your particular needs. Our technical service and sales department will provide you with expert advice and will help make the unusual possible.

Owing to our continuous improvement process, we are able to guarantee exceptionally short lead times, not only for standard concepts, but also complex, individual designs. Whether in small quantities or special colours – you can always rely on us. To us, only one thing is important: your needs. That's what our staff are there for. If need be, around the clock.

Certifications and Guarantees

DURAGLOSS® surfaces carry a guarantee of up to 20 years. In all the countries we supply, we are certified to ISO and ECCA (European Coil Coating Association) standards. Our manufacturing plant is certified to ISO 9001 Version 2000 and ISO 14001.
